<b>Goals</b>	Develop a good quality and working Chatbot based on defined requirements
	Achieve the technical target in good atmosphere and clear communication
<b>Meeting norms</b>	Meeting topics are inserted in the agenda before the meeting starts
	Everybody aims to be on time, but being late is communicated beforehand and handled in an agile way
	Meeting topics need to be sharp and precise
	Meeting time must not be exceeded more than 30 min, otherwise schedule a new meeting
<b>Working norms</b>	We value quality over quantity
	Everyone contributes regularly and communicates openly
<b>Coordination norms</b>	Everyone sticks to their roles and in case of problems communicates
<b>Communication norms</b>	We check our communication channels at least once a day
	Important messages are sent in our WhatsApp group
<b>Consideration norms</b>	We discuss disagreement openly
	We vote for a final resolution
	We help in case someone needs it
<b>Cont. improvement norms</b>	Happiness index and stand up emails are reviewed in team meeting
	If problems are recognized escalate them to the team
<b>Rewards</b>	Online team event
	Everyone celebrates via a reaction in the zoom chat after each sprint
<b>Sanctions</b>	Assign unwanted jobs to person (rework a file, ...)
<b>Signatures</b>	Tobias Konheiser
	Hafidz Arifin
	Amela Pucic
	Emanuel Erben
	Sara El Brak
	Jesse Palarus
	Felix Nützel
	Abdelkader Alkadour
	Vukica Stojkovic

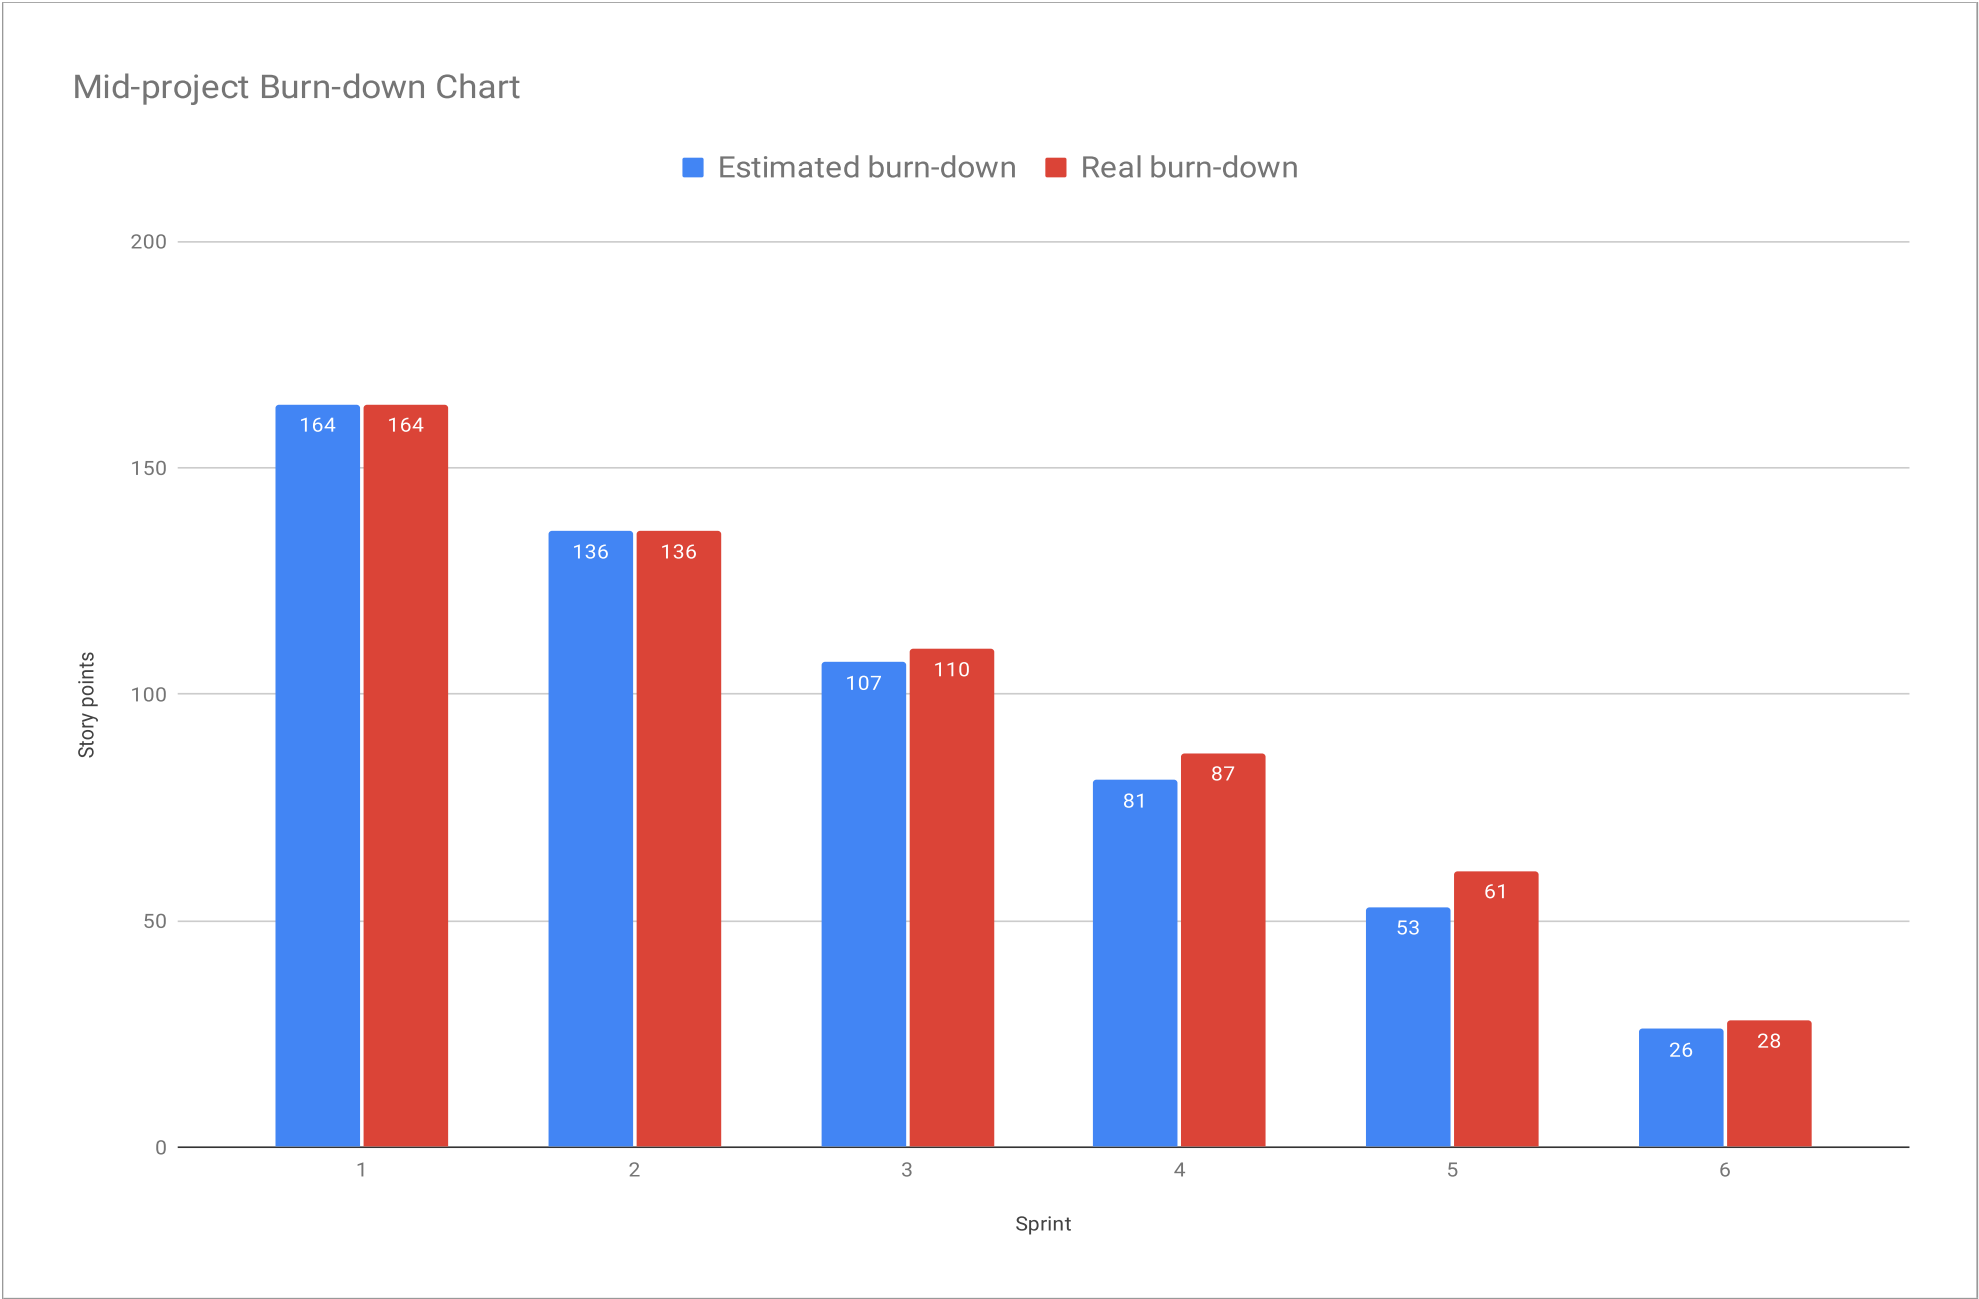

Product Vision	Project Mission
<p>QAchat envisions an environment in which access to knowledge is just a message away. We aim to leverage the rapid advancement in language model technologies to create a seamless interface that enables employees to get their questions answered accurately, quickly, efficiently, and with ease - by a general language model that is trained on specific knowledge. Our goal is to provide a simple and convenient point of contact, with an easy-to-use interface that is integrated into widely used communication tools, and to make knowledge accessible to everyone - irrespective of their geographical location, language or technical ability.</p>	<p>QAchat evaluates newly developed LLMs to create a chatbot that provides users with accurate, reliable and context-specific answers to their questions - with a focus on accessibility and ease of use. The best suited network is trained on provided data that is collected from existing communication and documentation sources. The model is made available to users through a Slackbot integration, where questions can be asked and answers are provided.</p>

[illegible]

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
Release							
	Total			164	164		
Sprints							
1	Large Language Model methods			28	164	28	164
2	Software architecture			29	136	26	136
3	Large Language Model prototypes			26	107	23	110
4	Code frameworks			28	81	26	87
5	Setup & Documentation			27	53	33	61
6	Data Integration & Documentation Enhancement			26	26	28	28
Features							
1	Large Language Model methods						
		Identify the existing capabilities of LLM methods and their underlying algorithms					
			Research Slack bot requirement	5		5	
			Research LLM models	5		5	
			Research LLM method 1 (search API) properties	5		5	
			Research LLM method 2 (semantic search) properties	5		5	
			Research LLM method 3 (fine tuning) properties	5		5	
			Team logo design	3		3	
2	Software architecture						
		Determine the software architecture and the used components					
			Define diagram of runtime components	5		5	
			Define diagram of code components	8		8	
			A summary of the underlying technology stack	5		3	
			Textual explanation of the diagrams and choices	5		5	
			Initialize code repository	3		3	
			Initialize the software bill of materials	3		2	
3	Large Language Model prototypes						
		Further evaluate the functionality of each LLM method					
			Research semantic search vector storage	5		3	
			Research Slack web server hosting	5		3	
			Implement Alpaca/LLaMA LLM prototype	3		5	
			Implement BERT LLM prototype	5		3	
			Implement T5 LLM prototype	3		3	
			Create the LLM-server code framework	3		5	
			Create coding guidelines	2		1	
4	Code frameworks						
		Provide a structured foundation for building the chatbot					
			Research LLM server hosting	5		5	
			Determine the communication protocols used	3		3	
			Create Slack bot code framework	5		3	
			Create the semantic search code framework	3		3	
			Create the data processing code framework	3		5	
			Update product vision and product mission	3		2	
			Test Slack	3		2	
			Test DeepL API	3		3	
5	Setup & Documentation						

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
		Prepare the necessary setups and extend the documentation					
			Create a build process video	5		8	
			Create a secure and private file exchange channel	3		3	
			Create testing setup	5		8	
			Set up vector database	2		2	
			Set up LLM for embedding generation	2		2	
			Move existing documentation to GitHub Wiki	5		5	
			Document Slackbot setup process	2		2	
			Set up LLM for chat message generation	3		3	
6	Data Integration & Documentation Enhancement						
		Enhance data integration capabilities and improve project documentation					
			Setup LLM in the Google cloud	8		8	
			Implement a blacklist for Confluence pages and other data sources	3		3	
			Read data from Confluence into vector database	5		5	
			Read data from PDF into vector database	3		5	
			Initialize user, (technical) design, and build/deploy documentation	5		5	
			Clean-up mid-project release plan & create final project release plan	2		2

			Set up vector database	2		2	
			Set up LLM for embedding generation	2		2	
			Move existing documentation to GitHub Wiki	5		5	
			Document Slackbot setup process	2		2	
			Set up LLM for chat message generation	3		3	
6	Data Integration & Documentation Enhancement						
		Enhance data integration capabilities and improve project documentation					
			Setup LLM in the Google cloud	8		8	
			Implement a blacklist for Confluence pages and other data sources	3		3	
			Read data from Confluence into vector database	5		5	
			Read data from PDF into vector database	3		5	
			Initialize user, (technical) design, and build/deploy documentation	5		5	
			Clean-up mid-project release plan & create final project release plan	2		2	
7	Cloud Hosting & Data Integration						
		Establish cloud hosting of the software and expand data integration abilities					
			Setup LLM in the Google cloud	5		8	
			Read data from Confluence into vector database	3		5	
			Document and summarise all services available to the project team	2		1	
			Read data from Slack conversation into vector database	5		5	
			Detect Slackbot language	3		3	
			Create integration tests for database reading and writing	3		3	
8	Cloud Documentation & Database Management						
		Document cloud hosting setup and further enhance database management					
			Setup LLM in the Google cloud (documentation)	3		3	
			Check conformity with NDA	1		1	
			Cleanup the repository	5		5	
			Split up long text block for database	5		5	
			Delete outdated database entries for all data sources	5		3	
			Read data from Confluence into vector database (finalization)	3		5	
9	Automation & Bugfixes						
		Automate the Slackbot execution and fix identified bugs					
			check conformity with NDA	1			
			clean up the repository	2			
			setup Slackbot in the Google cloud	5			
			research / implement an automation for data extraction	5			
			debug and fix an insufficient information issue of the LLM	5			

Sprint	Theme	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
			identify names in the data and exclude them from the translation process	5			
			read data from Google Docs into vector database	3			

Final-project Burn-down Chart

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
10	Acceptance criteria are met.		
11	Work products are uploaded to the Github repository.		
12	A pull request is created for each related branch.		
13	The work products in the pull requests are reviewed.		
14	The corresponding branches are merged and closed.		
15	The bill of materials section of the planning documents is updated.		
16	All defined conventions are complied with.		
21		A release candidate with a working and meaningful increment to the previous sprint is tagged.	
22		Previously established features and security mechanisms must continue to work.	
23			
31			The project can be successfully built and deployed.
32			All created tests are passed.
34			The implemented features pass a simple user test.
35			Developer documentation is created.
36			User documentation is created and updated
37			The release has been approved by all team members

Role	Tasks
Everyone	participate in lecture participate in team meeting write 2 stand up emails
PO	update feature board update planning documents
SD	work on issues update bill of materials
SM	update impediments backlog
Release Manager	ensure that sprint release candidate is tagged

Role	Tasks
PO	create feature board screenshot create planning document PDF
SD	push current work update assigned issues
SM	create impediments backlog screenshot
Release Manager	tag sprint release candidate

<b>Meeting Preparation</b>	<p>ensure product backlog is ready</p> <p>coordinate with Release Manager</p>	
<b>Sprint Review</b>	<p>ask Release Manager to build release candidate</p> <p>walk through "Awaiting review" issues</p> <ul style="list-style-type: none"> <li>- ask SD to demo item under review</li> <li>- check fulfillment of acceptance and DoD criteria</li> <li>- move item to feature archive (add label "Real Size = Y") or move issue to product backlog</li> </ul>	Product Owner 1
<b>Sprint Release</b>	<p>decide whether release candidate should be released</p> <p>coordinate with Release Manager</p>	
<b>Sprint Retrospective</b>	<p>SM TODOs</p> <p>answer Happiness Index</p>	Scrum Master
<b>Sprint Planning</b>	<p>reprioritize product backlog items</p> <p>start by most important backlog item and ask SDs to estimate the story points, do until SDs have enough work</p> <p>story points = {0, 1, 2, 3, 5, 8, 13}</p>	Product Owner 2
<b>Meeting After-work</b>	<p>update planning documents</p> <p>update feature board</p>	

**Steps to create a Github Issue:**

1. Go here: [Issues · amosproj/amos2023ss03-qachat \(github.com\)](https://github.com/amosproj/amos2023ss03-qachat/issues)
2. click "New issue"
3. select correct template
4. write a title and description that follow the INVEST criteria Independent, Negotiable, Valuable, Estimatable, Small, Testable
5. select the correct project "amos2023ss03-feature-board"
6. select the correct milestone (optional) "sprint-{XY}"
7. add correct labels "Est. size = X" and issue type
8. add Assignees (optional)
9. click "Submit new issue"
10. go here: [amos2023ss03-feature-board \(github.com\)](https://github.com/amos2023ss03-feature-board)
11. move issue to Product Backlog
12. open issue and set corresponding priority

Average Story Points per Sprint:	25
Current Sprint:	9
Available Sprints:	4
Available Story Points:	100
Homework	Rough Estimations
Sprint 12	20
Sprint 13	10
Story Points available for Product:	70
Open Issues	Rough Estimations
create a schedule for cloud hosting	5
create integration tests for Confluence data	5
create performance tests for Slackbot with LLM	8
create performance tests for data reading	5
read real data in database	3
create a message indicating the processing of the Slackbot	3
read data from website into vector database	0
CLOUD HOSTING	5
REAL DATA	5
BUGFIXES	10
TESTING	10

DOCUMENTATION	5
BEAUTIFICATION	5
<b>Story Point Account at the END:</b>	<b>1</b>
