

Notes:

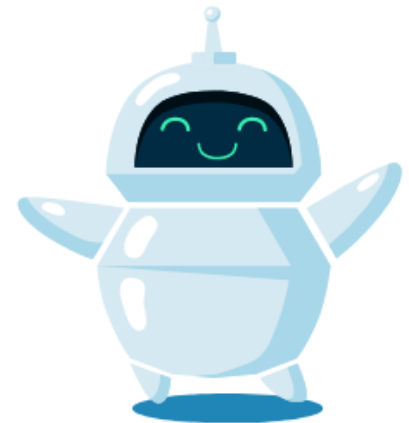

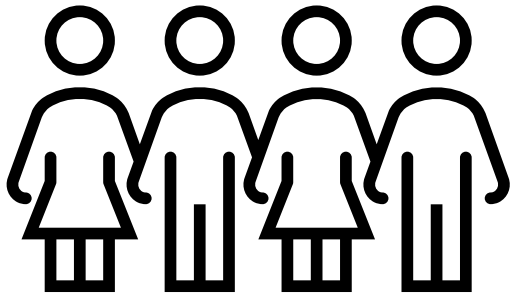

- It's only a draft and is not beautiful yet
- Slide 2-5 could be simulated in Slack (Intro for Video)
- Video will be published online, we decided not to put any pictures of ourselves in it

Hi, what was your project about?

Hi, what was your project about?

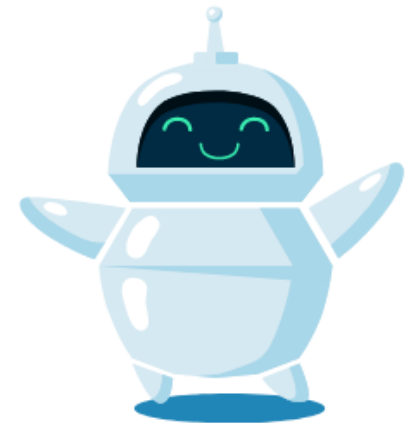

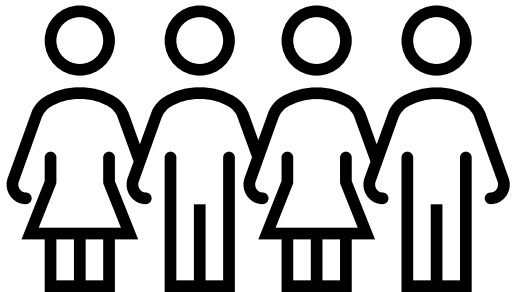

We implemented a QABot for QAware

Hi, what was your project about?

We implemented a QABot for QAware

How did you do that? And how does it work?

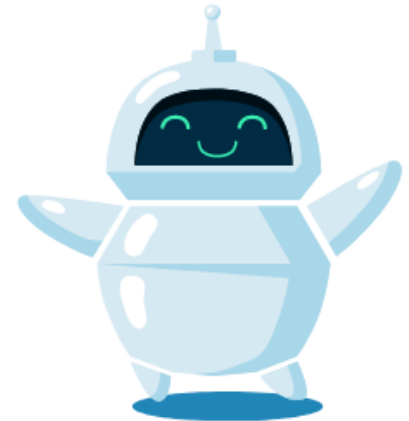

Hi, what was your project about?

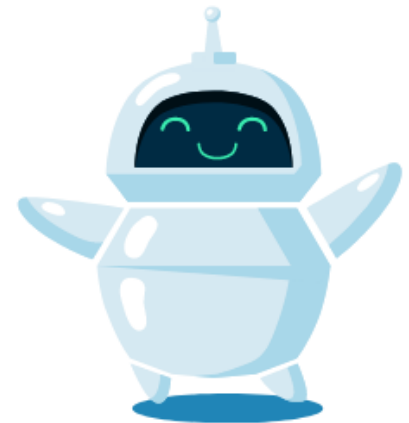

We implemented a QABot for QAware

How did you do that? And how does it work?

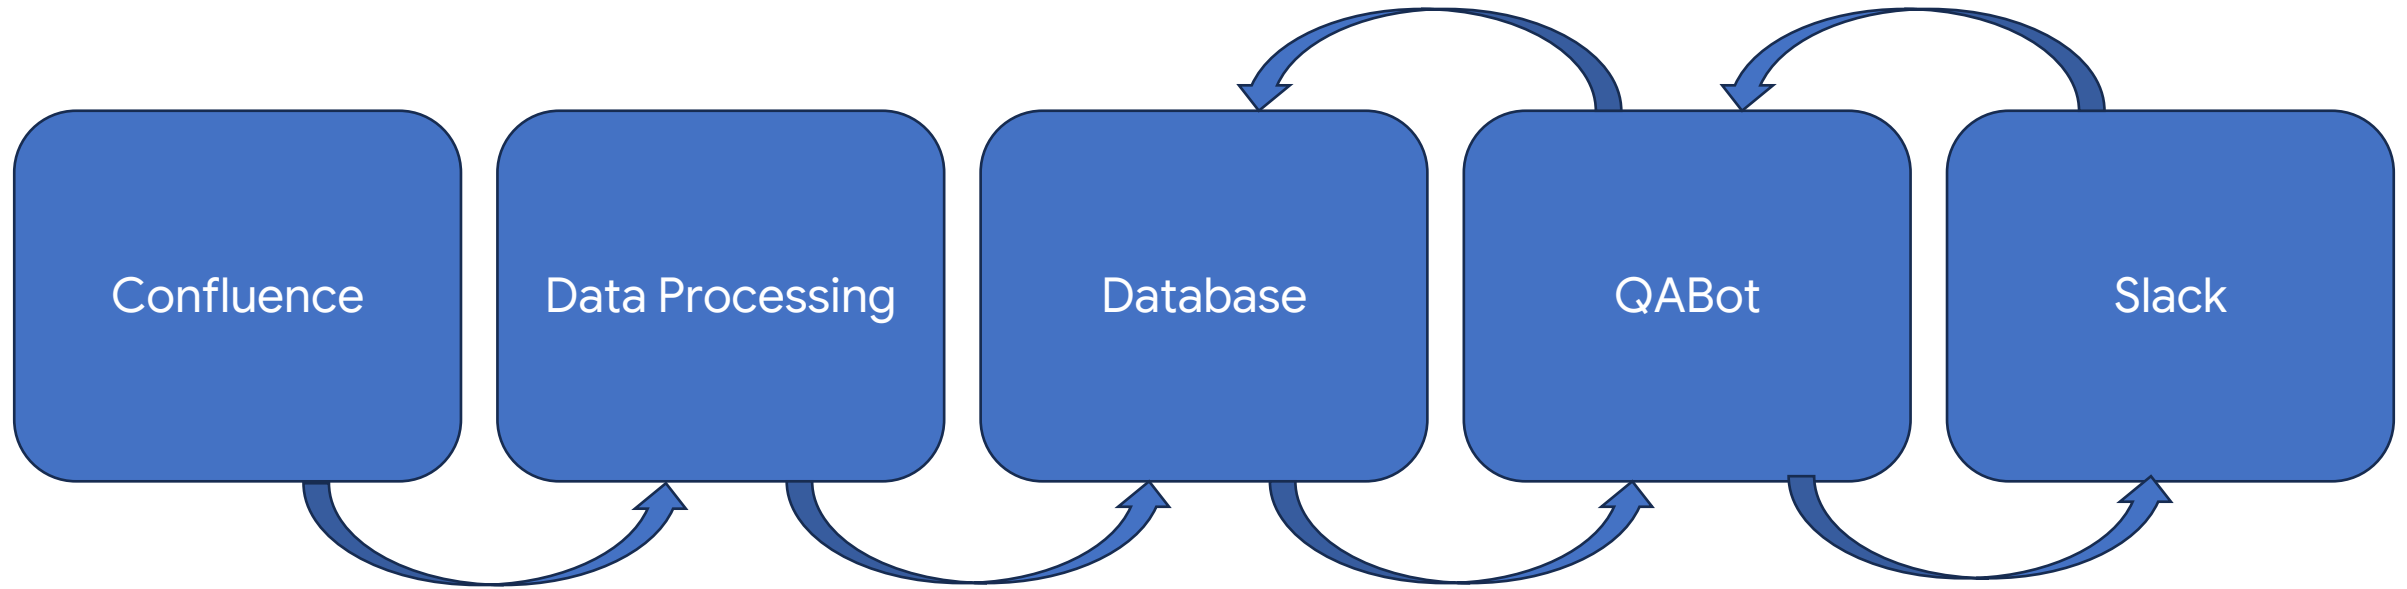

I will show it to you

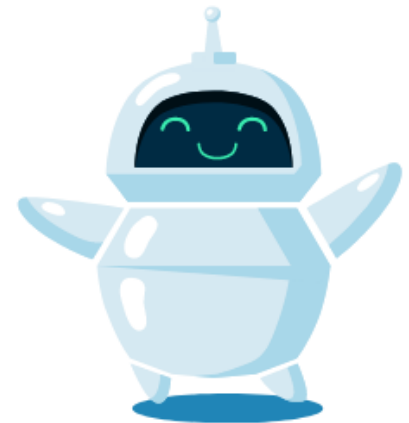

Firstly, let us take a look to the
Architecuture.

Design/Architecture

Now, lets talk about the
requirements

Requirements

- It must run on Slack
- It must retrieve data from confluence and google drive(?)
- It must have a blacklist to censor some sensitive data

Let's try out the Slackbot!
