AMOS P3 - Planning Document Team Contract

| Goals | Develop a good quality and working Chatbot based on defined requirements | | | | |
|-------------------------|---|--|--|--|--|
| | Achieve the technical target in good atmosphere and clear communication | | | | |
| Meeting norms | Meeting topics are inserted in the agenda before the meeting starts | | | | |
| | Everybody aims to be on time, but being late is communicated beforehand and handled in an agile way | | | | |
| | Meeting topics need to be sharp and precise | | | | |
| | Meeting time must no be exceeded more than 30 min, otherwise schedule a new meeting | | | | |
| Working norms | We value quality over quantity | | | | |
| | Everyone contributes regularly and communicates openly | | | | |
| Coordination norms | Everyone sticks to their roles and in case of problems communicates | | | | |
| Communication norms | We check our communication channels at least once a day | | | | |
| | Important messages are send in our WhatsApp group | | | | |
| Consideration norms | We discuss disagreement openly | | | | |
| | We vote for a final resolution | | | | |
| | We help in case someone needs it | | | | |
| Cont. improvement norms | Happiness index and stand up emails are reviewed in team meeting | | | | |
| | If problmes are recognized escalate them to the team | | | | |
| Rewards | Online team event | | | | |
| | Everyone celebrates via a reaction in the zoom chat after each sprint | | | | |
| Sanctions | Assign unwanted jobs to person (rework a file,) | | | | |
| Signatures | Tobias Konheiser | | | | |
| _ | Hafidz Arifin | | | | |
| | Amela Pucic | | | | |
| | Emanuel Erben | | | | |
| | Sara El Brak | | | | |
| | Jesse Palarus | | | | |
| | Felix Nützel | | | | |
| | Abdelkader Alkadour | | | | |
| | Vukica Stojkovic | | | | |

AMOS P3 - Planning Document Product Goal

| Product Vision | Project Mission |
|--|---------------------------------|
| | |
| QAchat envisions an environment in which access to knowledge is just a message away. We aim to leverage the rapid advancement in language model technologies to create a seamless interface that enables employees to get their questions answered accurately, quickly, efficiently, and with ease - by a general language model that is trained on specific knowledge. Our goal is to provide a simple and convenient point of contact, with an easy-to-use interface that is integrated into widely used communication tools, and to make knowledge accessible to everyone - irrespective of their geographical location, language or technical ability. | asked and answers are provided. |
| | |

AMOS P3 - Planning Document Product Glossary

| Term | Definition |
|---|---|
| Administrator (Admin) | An Administrator is a person who has access to all parts of the project. |
| Application Programming Interface (API) | An API is a defined interface that applications can use to exchange data and information. |
| Artificial Intelligence (AI) | Artificial Intelligence is a field of research that aims to make computers think and act like humans. |
| Chatbot | A chatbot is an application that can communicate with a user through short text messages and answer questions using artificial intelligence. |
| Company-Internal Information | Company-Internal Information is information about the company and its projects and processes that is publicly available or stored in Confluence, Slack, and Google Drive. |
| Confluence | Confluence is a software used to document various types of data. |
| Google Drive | Google Drive is a cloud storage solution provided by Google. |
| Large Language Model (LLM) | A Large Language Model is an Al model specialized for text and sentence generation. |
| LLaMA | LLaMA is an open source LLM that has been developed by Meta and Stanford. |
| Slack | Slack is a software that is used for text messaging between groups or individuals. |
| Slackbot | A Slackbot is a chatbot that is integrated into Slack. |
| User | A user is a person who interacts with the system by chatting with the Slackbot. |
| Weaviate | open-source, cloud-native, and decentralized vector search engine that enables intelligent search and discovery of structured and unstructured data using machine learning. |
| Embedding | refers to the process of representing data (context), such as words or objects, as numerical vectors in a high-dimensional space for use in machine learning algorithms. |
| DeepL | advanced neural machine translation system that provides highly accurate and fluent translations in multiple languages. |
| IP Meeting | Industry Partner Meeting (our client) |
| WizardLM 13b | language model with increased context length, utilizing SuperHOT GGMLs and RoPE, designed for generating human-like text and achieving high accuracy in language tasks. |
| | |

AMOS P3 - Planning Document Final-project Burn-down

AMOS P3 - Planning Document Definition of Done

| # | Feature Definition of Done | Sprint Release Definition of Done | Project Release Definition of Done |
|----|---|---|---|
| 10 | Acceptance criteria are met. | | |
| 11 | Work products are uploaded to the Github repository. | | |
| 12 | A pull request is created for each related branch. | | |
| 13 | The work products in the pull requests are reviewed. | | |
| 14 | The corresponding branches are merged and closed. | | |
| 15 | The bill of materials section of the planning documents is updated. | | |
| 16 | All defined conventions are complied with. | | |
| 21 | | A release candidate with a working and meaningful increment to the previous sprint is tagged. | |
| 22 | | Previously established features and security mechanisms must continue to work. | |
| 23 | | | |
| 31 | | | The project can be successfully built and deployed. |
| 32 | | | All created tests are passed. |
| 34 | | | The implemented features pass a simple user test. |
| 35 | | | Developer documentation is created. |
| 36 | | | User documentation is created and updated |
| 37 | | | The release has been approved by all team members |

Checklists Sprint-Tasks

| Role | Tasks |
|-----------------|--|
| Everyone | participate in lecture |
| | participate in team meeting |
| | write 2 stand up emails |
| | |
| | |
| PO | update feature board |
| | update planning documents |
| | |
| | |
| SD | work on issues |
| | update bill of materials |
| | |
| | |
| SM | update impediments backlog |
| | |
| | |
| Release Manager | ensure that sprint release candidate is tagged |
| | |
| | |

Checklists Pre-Team-Meeting

| Role | Tasks |
|-----------------|---------------------------------------|
| PO | create feature board screenshot |
| | create planning document PDF |
| | |
| | |
| SD | push current work |
| | update assigned issues |
| | |
| | |
| SM | create impediments backlog screenshot |
| | |
| | |
| Release Manager | tag sprint release candidate |
| | |
| | |

Checklists Team-Meeting (POs)

| Meeting Preparation | ensure product backlog is ready coordinate with Release Manager | | |
|----------------------|--|-----------------|--|
| Sprint Review | ask Release Manager to build release candidate walk through "Awaiting review" issues - ask SD to demo item under review - check fulfillment of acceptance and DoD criteria - move item to feature archive (add label "Real Size = Y") or move issue to product backlog | Product Owner 1 | |
| Sprint Release | decide whether release candidate should be released coordinate with Release Manager | | |
| Sprint Retrospective | SM TODOs answer Happiness Index | Scrum Master | |
| Sprint Planning | reprioritize product backlog items start by most important backlog item and ask SDs to estimate the story points, do until SDs have enough work story points = {0, 1, 2, 3, 5, 8, 13} | Product Owner 2 | |
| Meeting After-work | update planning documents update feature board | | |

Checklists Issue-Creation

Steps to create a Github Issue:

1. Go here: <u>Issues · amosproj/amos2023ss03-qachat (github.com)</u>

2. click "New issue"
