AMOS P3 - Planning Document Team Contract

Goals	Develop a good quality and working Chatbot based on defined requirements
	Achieve the technical target in good atmosphere and clear communication
Meeting norms	Meeting topics are inserted in the agenda before the meeting starts
	Everybody aims to be on time, but being late is communicated beforehand and handled in an agile way
	Meeting topics need to be sharp and precise
	Meeting time must no be exceeded more than 30 min, otherwise schedule a new meeting
Working norms	We value quality over quantity
	Everyone contributes regularly and communicates openly
Coordination norms	Everyone sticks to their roles and in case of problems communicates
Communication norms	We check our communication channels at least once a day
	Important messages are send in our WhatsApp group
Consideration norms	We discuss disagreement openly
	We vote for a final resolution
	We help in case someone needs it
Cont. improvement norms	Happiness index and stand up emails are reviewed in team meeting
	If problmes are recognized escalate them to the team
Rewards	Online team event
	Everyone celebrates via a reaction in the zoom chat after each sprint
Sanctions	Assign unwanted jobs to person (rework a file,)
Signatures	Tobias Konheiser
_	Hafidz Arifin
	Amela Pucic
	Emanuel Erben
	Sara El Brak
	Jesse Palarus
	Felix Nützel
	Abdelkader Alkadour
	Vukica Stojkovic

AMOS P3 - Planning Document Product Goal

Product Vision	Project Mission
QAchat envisions an environment in which access to knowledge is just a message away. We aim to leverage the rapid advancement in language model technologies to create a seamless interface that enables employees to get their questions answered accurately, quickly, efficiently, and with ease - by a general language model that is trained on specific knowledge. Our goal is to provide a simple and convenient point of contact, with an easy-to-use interface that is integrated into widely used communication tools, and to make knowledge accessible to everyone - irrespective of their geographical location, language or technical ability.	asked and answers are provided.

AMOS P3 - Planning Document Product Glossary

Term	Definition
Administrator (Admin)	An Administrator is a person who has access to all parts of the project.
Application Programming Interface (API)	An API is a defined interface that applications can use to exchange data and information.
Artificial Intelligence (AI)	Artificial Intelligence is a field of research that aims to make computers think and act like humans.
BERT	BERT is an open source LLM that has been developed by Google.
Chatbot	A chatbot is an application that can communicate with a user through short text messages and answer questions using artificial intelligence.
Company-Internal Information	Company-Internal Information is information about the company and its projects and processes that is publicly available or stored in Confluence, Slack, and Google Drive.
Confluence	Confluence is a software used to document various types of data.
Google Drive	Google Drive is a cloud storage solution provided by Google.
Large Language Model (LLM)	A Large Language Model is an Al model specialized for text and sentence generation.
LLaMA	LLaMA is an open source LLM that has been developed by Meta and Stanford.
Slack	Slack is a software that is used for text messaging between groups or individuals.
Slackbot	A Slackbot is a chatbot that is integrated into Slack.
T5	T5 is an open source LLM that has been developed by Google.
User	A user is a person who interacts with the system by chatting with the Slackbot.

AMOS P3 - Planning Document Definition of Done

#	Feature Definition of Done	Sprint Release Definition of Done	Project Release Definition of Done
10	Acceptance criteria are met.		
11	Work products are uploaded to the Github repository.		
12	A pull request is created for each related branch.		
13	The work products in the pull requests are reviewed.		
14	The corresponding branches are merged and closed.		
15	The bill of materials section of the planning documents is updated.		
16	All defined conventions are complied with.		
21		A release candidate with a working and meaningful increment to the previous sprint is tagged.	
22		Previously established features and security mechanisms must continue to work.	
23			
31			The project can be successfully built and deployed.
32			All created tests are passed.
34			The implemented features pass a simple user test.
35			Developer documentation is created.
36			User documentation is created and updated
37			The release has been approved by all team members

Team Meeting Agenda 2023_05_22_QAware

Team Meeting Agenda "AMOS QAchat"

Topic Time Author Description Result Decision Responsible demonstration of current 1 state 10 10 TBD 2 questions from Sebastian - About the NDA: Shoud we plan for real data or create dummy data?
- Which datatypes should be supported (PDF, Docx, HTML, Confluence, Slack)? - NDA for real data - focus on Confluence, Slack General - Who will be allowed to add data to the database?
- Which interface (CLI, GUI) should be created for data ingestion? channel would be gread
- automatic database update with blacklist 3 questions to Sebastian 10 Tobi - should there be a IAM or sth like this for the data when the user ask a question - in which language should the ChatBot answer (always german???) 4 questions to Sebastian 20 Team - language change would be nice to have 5 10 50

Checklists Sprint-Tasks

Role	Tasks
Everyone	participate in lecture
	participate in team meeting
	write 2 stand up emails
PO	update feature board
	update planning documents
SD	work on issues
	update bill of materials
SM	update impediments backlog
Release Manager	ensure that sprint release candidate is tagged

Checklists Pre-Team-Meeting

Role	Tasks
PO	create feature board screenshot
	create planning document PDF
SD	push current work
	update assigned issues
SM	create impediments backlog screenshot
Release Manager	tag sprint release candidate

Checklists Team-Meeting (POs)

Meeting Preparation	ensure product backlog is ready coordinate with Release Manager	
Sprint Review	ask Release Manager to build release candidate walk through "Awaiting review" issues - ask SD to demo item under review - check fulfillment of acceptance and DoD criteria - move item to feature archive (add label "Real Size = Y") or move issue to product backlog	Product Owner 1
Sprint Release	decide whether release candidate should be released coordinate with Release Manager	
Sprint Retrospective	SM TODOs answer Happiness Index	Scrum Master
Sprint Planning	reprioritize product backlog items start by most important backlog item and ask SDs to estimate the story points, do until SDs have enough work story points = {0, 1, 2, 3, 5, 8, 13}	Product Owner 2
Meeting After-work	update planning documents update feature board	

Checklists Issue-Creation

Steps to create a Github Issue:

1. Go here: <u>Issues · amosproj/amos2023ss03-qachat (github.com)</u>

2. click "New issue"

3. select corret template

4. write a title and description that follow the INVEST criteria

5. select the correct project

6. select the correct milestone (optional)

7. add correct labels

8. add Assignees (optional)

9. click "Submit new issue"

10. go here:

11. move issue to Product Backlog

12. open issue and set corresponding priority

Independent, Negotiable, Valuable, Estimatable, Small, Testable

"amos2023ss03-feature-board"

"sprint-{XY}"

"Est. size = X" and issue type

amos2023ss03-feature-board (github.com)
